Any recipient of this TMD who wants to acquire New Options under the Offers will need to complete the application form that will be in, or will accompany, the Prospectus. There is no cooling off period in respect of the issue of the New Options. This TMD is not a disclosure document for the purposes of the *Corporations Act 2001* (Cth), and therefore has not been lodged, and does not require lodgement, with the Australian Securities and Investments Commission (**ASIC**) nor does it contain a full summary of the terms and conditions of the New Options.

This TMD does not take into account what you currently have, or what you want and need, for your financial future. The Company is not licensed to provide financial product advice in relation to the New Options.

1. TARGET MARKET

Factor	Target market
Investment Objective	The Company expects that an investment in New Options will be suitable to investors who wish to gain exposure to equities in a small/mid-cap mining company listed on the Australian Securities Exchange (ASX).
Investment Timeframe	The target market of investors will take a short to medium term outlook on their investment. Investors with a short-term outlook for their investment will benefit from an anticipated listing of the New Options on ASX, as well as an ability to exercise the New Options

	<p>and trade the underlying Shares issued on exercise should the exercise price of the New Options be lower than the trading price of Shares. Investors with a medium-term outlook will benefit from an ability to exercise the New Options before the date that is 12 October 2025 and increase their shareholding and exposure to the potential upside in the Company's Shares into the future.</p> <p>Given the need to pay the exercise price in order to acquire Shares, Investors in the target market are in a financial position that is sufficient for them to invest their funds until 12 October 2025 should they wish to exercise their New Options. Any decision to exercise the New Options is likely to be based on the trading price of the Shares.</p>
<p>Product description and key attributes</p>	<p>The key eligibility requirements and product attributes of the New Options are:</p> <ul style="list-style-type: none"> • the Placement Options Offer is an offer to the Placement Participants of one (1) New Option for every two (2) Shares subscribed to under the Placement; • the SPP Options Offer is an offer to the SPP Participants of one (1) New Option for every two (2) SPP Shares subscribed to under the Placement; • no funds will be raised from the Offers; • the New Options are exercisable at \$0.028 per New Option with an expiry date of 12 October 2025; • a maximum of 188,600,000 New Options will be issued under the Offers; • the Offers are not being extended to, and the New Options will not be issued to, shareholders with a registered address which is outside Australia and New Zealand.
<p>Investment Metrics</p>	<p>While the Company does not have an established eligibility framework for investors based on metrics such as age, expected return or volatility, it is expected that the target market of investors will be able to withstand potential fluctuations in the value of their investment.</p> <p>An exercise price is required to be paid to acquire shares on exercise of New Options. As such, the capacity to realise the underlying value of the New Options would require that they be exercised on or before the expiry date. Investors in the target market will need to be in a financial position to have sufficient available funds so as to facilitate an exercise of the New Options prior to the expiry date. Prior to the expiry date, investors' ability to liquidate the New Options may be limited by a lack of liquidity in the trading of New Options and Shares and the price of the Shares.</p> <p>The New Options offer no guaranteed income or capital protection.</p>
<p>Risk</p>	<p>The Company considers that an investment in the New Options is highly speculative, such that an investment in the Company is not appropriate for an investor who would not be able to bear a loss of some or all of the investment. Investors should also have a sufficient level of financial literacy and resources (either alone or in</p>

	conjunction with an appropriate adviser) to understand and appreciate the risks of investing in New Options as an asset class generally and the more specific risks of investing in an Australian listed mining company.
